

Brijesh M Patil

Frontend Engineer | React, TypeScript, Web Performance

Bengaluru, India | +91 7815840654 | brijeshmpatil77@gmail.com | linkedin.com/in/brijeshmpatil77

SUMMARY

Frontend engineer with 3+ years of experience building production React and TypeScript applications, currently SDE 2 and technical lead for a 3-engineer team. Specialised in front-end architecture and performance engineering across 11 production applications for global brands. Delivered a 40% LCP reduction, CLS under 0.01 and Lighthouse above 90, and architected a design system of 50+ strictly-typed components adopted across 4 concurrent products.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, SQL

Frameworks and Libraries: React.js, React Hooks, Next.js, Tailwind CSS, GSAP

UI Architecture: Component design systems, design tokens, reusable component libraries, Figma to code translation

Performance: Core Web Vitals (LCP, CLS, INP), Lighthouse, rendering performance, code splitting, lazy loading, memory profiling

Responsive and Cross-Browser: Responsive web design, adaptive web design, cross-browser compatibility, mobile web

APIs and Cloud: REST APIs, JSON, AJAX, webhooks, AWS S3, AWS Lambda

Build and Testing: Webpack, Vite, Babel, Playwright

Accessibility and Security: WCAG 2.1 AA, ARIA patterns, screen readers, XSS prevention, CSP, CORS

AI-Assisted Development: Claude Code, Cursor, GitHub Copilot, repo-level AI context and standards files

PROFESSIONAL EXPERIENCE

SDE 2 - Frontend Engineer and Team Lead

ShopTrade, Bengaluru, India | April 2026 - Present

- Own front-end architecture across all client platforms, including component design systems, design tokens, state-management patterns and shared performance budgets that keep Core Web Vitals within target as features ship.
- Lead a team of 3 engineers and personally onboard and train new joiners and trainees, running their code reviews and pairing sessions until they ship independently, cutting ramp-up time by 50%.
- Architected a strictly-typed TypeScript component library of 50+ primitives used across 4 concurrent products, reducing feature delivery time by approximately 30%.
- Drive performance engineering across production sites, reducing LCP by 40%, holding CLS below 0.01 and lifting Lighthouse scores above 90 on both mobile and desktop through code splitting, render-path optimisation and asset strategy.
- Partner directly with Product Managers and UX designers to translate Figma wireframes into reusable, accessible, production-ready components.
- Use AI coding assistants (Claude Code, Cursor, GitHub Copilot) as a primary daily tool for component generation, refactoring, tests and documentation, maintaining repo-level standards files and reviewing all generated output for security, bundle size and accessibility before commit.

SDE 1 - Frontend Engineer

ShopTrade, Bengaluru, India | September 2023 - May 2026

- **Engineered a data-driven rendering engine** generating 1,000+ pages from structured content models, eliminating manual page creation entirely and reducing content deployment from days to minutes.
- **Built a chunked media upload pipeline** handling files over 1GB, with segmented transfer, progress tracking, automatic retry on failure, S3 pre-signed URLs and AWS Lambda server-side processing.
- **Designed GPU-accelerated animation systems** including parallax and scroll-driven sequences, sustaining 60fps on mid-range mobile devices across multiple browsers and resolutions.
- Delivered full WCAG 2.1 AA compliance across interactive components, covering keyboard navigation, focus trapping, ARIA patterns, screen-reader optimisation and prefers-reduced-motion support.
- Shipped 11 production web applications for global brands across e-commerce, healthcare, B2B and consumer verticals.
- Triaged and resolved production issues across live client sites, reproducing, diagnosing and shipping fixes under deadline pressure to minimise customer impact.

Frontend Engineer Intern

ShopTrade, Bengaluru, India | May 2023 - August 2023

- Shipped client-facing features within 6 weeks, built responsive UI components to design specification, and contributed to a shared component architecture adopted across 3 active projects.

EDUCATION

Master of Computer Applications (MCA) - Gogte Institute of Technology, Belgaum | 2021 - 2023

Bachelor of Computer Applications (BCA) - Govt. First Grade College, Shikaripura | 2018 - 2021
